	remcostoeten	remco-stoeten																				
Summary	<p>Dutch Front-End Engineer with a degree in Graphic Design and eight years experience across e-commerce, SaaS, open-source government, and e-learning projects. Skilled in TypeScript, React, and Next.js, with hands-on experience using PostgreSQL and SQLite (libSQL) through REST or GraphQL.</p> <p>Comfortable with Scrum, Kanban, and Shape Up methodologies, and passionate about delivering great developer experience (DX) through strong tooling. Currently expanding into full-stack technologies and exploring tools like Svelte, Tauri (Rust), and TanStack Start — aiming to grow into an architect role.</p>

Experience	<div><div>Brainstud / Allyoucanlearn</div><div>2025 - current</div><div>Frontend developer</div><div>Zwolle / Hybrid</div><div>https://brainstud.nl</div><div>Worked at a small company building an e-learning platform for Dutch mbo students and teachers, following the Shape Up methodology. The tech stack consisted of a well-architected Next.js application with TypeScript, and a custom REST layer via React Query connecting to a separate Laravel back end.</div></div> <div><div>Pleio</div><div>2023 - 2025</div><div>Front end developer</div><div>Remote</div><div>https://pleio.nl</div><div>Worked entirely open source, exclusively for non-profit and government organizations, in an autonomous Kanban setting with a small team of external principal freelancers.</div><div>Primarily worked on a site builder used by a large portion of the government as their intranet, built in React, GraphQL, and Django. Completely redesigned and developed FSV (Fraude Signalerings Platform) in plain JavaScript, SCSS, and Django. Also contributed to the ongoing development of a <u>PDF-checker</u> in Vue.</div></div> <div><div>Lasaulec/Distil</div><div>2022 - 2023</div><div>Software developer</div><div>Remote</div><div>https://lasaulec.nl/</div><div>Worked in-house, fully remote, and autonomously. Contributed to a React-based inventory management application and rebuilt the entire front end of the custom core webshop as the sole front-end developer, using <code>`.cshtml`</code> (Razor), a custom SCSS framework, and JavaScript.</div></div> <div><div>Tickles</div><div>2016 - 2022</div><div>Front end developer</div><div>Lemmer, Joure</div><div>https://tickles.nl</div><div>Started as an intern, learning the fundamentals of front-end development by building fully custom Magento 2 webshops from scratch for both B2B and B2C clients, using <code>`.phtml`</code>, SCSS (BEM), and JavaScript (Vanilla, jQuery, and KnockoutJS).</div></div>																					
Education	<div><div>ROC Friese Poort</div><div>2013 - 2017</div><div>Web and Video</div><div>Graphic Design</div><div>https://www.firda.nl/locaties/harste</div><div>School is nowadays called Firda. Did two internships. One at <u>Speak</u> where I did WordPress and narrow casting, and at <u>Tickles</u>, in which I got offered a job after the end period.</div><div>If I wouldn't have been offered the job, I would have continued studying CMD (Communication & Multimedia Design).</div></div>																					
Projects	<div><div>Fync</div><div>Package to unify populair API's</div><div>WiP</div><div>A package I built because I got tired of all the different API's when working with common API's like GitHub, Vercel, NPM, Spotify and many more.</div><div>https://github.com/remcostoeten/fync</div><div>https://www.npmjs.com/package/@remcostoeten/fync</div><div>npm, TypeScript, Package</div></div> <div><div>RYOA</div><div>Showcasing how to roll your own auth in NextJS</div><div>https://github.com/remcostoeten/nextjs-15-roll-your-own-authentication</div><div>Showcasing that rolling your own auth is not as hard as people make it seem like.</div><div>Database is broken in the demo but source code is fine.</div><div>oauth, jwt, nextjs, typescript, encryption, postgresql, libsql</div></div> <div><div>Various projects</div><div>I build a lot</div><div>https://github.com/remcostoeten</div></div> <div><div>DX & Tooling</div><div><ul style="list-style-type: none"><u>Docki</u> – Easy insert with AI (local/cloud) or none, JSDoc/Docstrings.<u>Hygienic</u> – Tool to clean up your code mess.<u>Turso (SQLite/LibSQL)</u> – Create and retrieve environment variables with one script.</div></div> <div><div>Components</div><div><ul style="list-style-type: none">The <u>most beautiful</u> and easy-to-use file tree you'll see.The <u>most beautiful</u> and easy-to-use code block component you'll see.</div></div> <div><div>... Working on</div><div><ul style="list-style-type: none">An MDX & code snippet desktop application in Tauri 2.0 & React.A database management application in Tauri 2.0 & TypeScript.A work commute and expense tracker in Next.js + PostgreSQL.... dozens of others.</div></div>
