Summary
Dutch Front-End Engineer with a degree in Graphic Design and eight years experience
across
e-commerce, SaaS, open-source government, and e-learning projects. Skilled in
TypeScript,
React, and Next.js, with hands-on experience using PostgreSQL and SQLite (libSQL)
through
REST or GraphQL.
Comfortable with Scrum, Kanban, and Shape Up methodologies, and passionate about
delivering great developer experience (DX) through strong tooling. Currently
expanding into
full-stack technologies and exploring tools like Svelte, Tauri (Rust), and TanStack
aiming to grow into an architect role.
Skills
HTML
(S)CSS, Tailwind, Styled components
JavaScript
TypeScript
React
NextJS
Git
NPM, PNPM, yarn, bun
SolidJS, Tanstack Start, Qwik, Svelte
Hobby
Figma & Photoshop
Docker
PostgreSQL, LibSQL, SQLite
Drizzle-orm, Prisma
NodeJS
Hobby - Hono, Express
```

Lua

Experience

Vim, SSH, Shell/Bash/Fish, CMD

Brainstud / Allyoucanlearn

Frontend developer

2025 - current

Zwolle / Hybrid

nhttps://brainstud.nl

Worked at a small company building an e-learning platform for Dutch mbo students and

teachers, following the Shape Up methodology. The tech stack consisted of a well-architected

Next.js application with TypeScript, and a custom REST layer via React Query connecting to a $\overline{\ }$

separate Laravel back end.

Pleio

Front end developer

2023 - 2025

Remote

□https://pleio.nl

Worked entirely open source, exclusively for non-profit and government organizations, in an autonomous Kanban setting with a small team of external principal freelancers.

Primarily worked on a site builder used by a large portion of the government as their intranet,

built in React, GraphQL, and Django. Completely redesigned and developed FSV (Fraude

Signalerings Platform) in plain JavaScript, SCSS, and Django. Also contributed to the ongoing

development of a PDF-checker in Vue.

Lasaulec/Distil Software developer

2022 - 2023

Remote

nhttps://lasaulec.nl/

Worked in-house, fully remote, and autonomously. Contributed to a React-based inventory

management appl3ication and rebuilt the entire front end of the custom core webshop as the

sole front-end developer, using `.cshtml` (Razor), a custom SCSS framework, and JavaScript.

Tickles

Front end developer

2016 - 2022 Lemmer, Joure

nhttps://tickles.nl

Started as an intern, learning the fundamentals of front-end development by

building fully

custom Magento 2 webshops from scratch for both B2B and B2C clients, using `.phtml`, SCSS (BEM), and JavaScript (Vanilla, jQuery, and KnockoutJS).

Education ROC Friese Poort

Web and Video

2013 - 2017 Graphic Design

nhttps://www.firda.nl/locaties/harste

School is nowadays called Firda. Did two internships. One at Speak where I did WordPress and narrow casting, and at Tickles, in which I got offered a job after the end period.

If I wouldn't have been offered the job, I would have continued studying CMD (Communication & Multimedia Design).

Projects

Fync

Package to unify populair API's

A package I built because I got tired of all the different API's when working with common API's

like GitHub, Vercel, NPM, Spotify and many more.

https://github.com/remcostoeten/fync

https://www.npmjs.com/package/@remcostoeten/fync

npm, TypeScript, Package

RY0A

Showcasing how to roll your own auth in NextJS

ahttps://github.com/remcostoeten/nextjs-15-roll-your-own-authentication

Showcasing that rolling your own auth is not as hard as people make it seem like.

Database is broken in the demo but source code is fine.

oauth, jwt, nextjs, typescript, encryption, postgresql, libsql

Various projects I build a lot

□https://github.com/remcostoeten

DX & Tooling

Docki - Easy insert with AI (local/cloud) or none, JSDoc/Docstrings.

Hygienic - Tool to clean up your code mess.

Turso (SQLite/LibSQL) - Create and retrieve environment variables with one script.

Components

The most beautiful and easy-to-use file tree you'll see.

The most beautiful and easy-to-use code block component you'll see.

... Working on

An MDX & code snippet desktop application in Tauri 2.0 & React.

A database management application in Tauri 2.0 & TypeScript.

A work commute and expense tracker in Next.js + PostgreSQL.

... dozens of others.
